

EQUINIX COMPANY FACT SHEET

The Global Platform for Digital Business

Digital transformation has gone global and enterprises must adapt. Competing in the digital economy means becoming a business technology company first, letting go of old IT constraints, and developing an infrastructure built for distributed scale and security. Companies need new architectures that connect their digital business physically and virtually around the world. That requires superior interconnection at the digital edge, and access to leading ecosystems, partners and markets. Platform Equinix® is where everything you need to create your digital future is within reach.

Our robust interconnection platform spans 52 markets on five continents, and hosts an advanced portfolio of digital services and ecosystems that allows you to securely scale your digital infrastructure wherever opportunity leads. More than 9,800 companies populate its diverse ecosystems, and all are potential partners or customers. Platform Equinix also offers the products, services and solutions to deploy an Interconnection Oriented Architecture® (IOA®) strategy, which delivers the flexibility, scalability and connectivity digital businesses need to win. Build here and go anywhere.

🌐 Global data centers

Come together, connect, grow

Equinix has invested more than \$22 billion** to create Platform Equinix, a colocation and interconnection platform that extends across 200 global data centers. This investment, unmatched in our industry, gives you unparalleled access to the markets and ecosystems that drive digital business worldwide.

Buyers and sellers, suppliers and manufacturers, service providers and enterprises all interconnect under one roof at Equinix. More than 1,800 network and 2,900 cloud and IT service providers, including Amazon Web Services, Microsoft Azure, Google Cloud Platform, IBM SoftLayer, Oracle Cloud and VMware vCloud Air, help you design the fastest, safest, lowest-latency routes globally.

Platform Equinix allows you to bring networks, security, data and applications close to your partners and users to reach most global markets almost instantly. And our proven security and reliability protect you as you invent and implement new digital business models.

We've also made a long-term pledge to power Platform Equinix with 100% clean and renewable energy. This drives us to embrace innovation that reduces carbon emissions, advances our business and helps our customers operate more sustainably.

🌐 Interconnection solutions

Innovative solutions to speed the way

The Equinix innovative portfolio of interconnection solutions helps you achieve your global digital transformation objectives faster:

Equinix Performance Hub® brings IT resources to the digital edge, where the physical and virtual worlds meet, allowing you to quickly and safely connect to the people, clouds and data exchanges that a digital business requires.

Equinix Interconnections include Cross Connects and virtual connections between businesses in the same data center and across Equinix Cloud Exchange Fabric™. We have installed more than 330,000 of these private and direct, one-to-one connections worldwide.

Equinix Cloud Exchange Fabric is a software-defined interconnection solution that enables you to weave together distributed infrastructure and digital ecosystems across metros to drive your digital future forward.

Equinix Data Hub™ enables you to safely position large volumes of data where you need them, so they can be easily and securely processed, analyzed and retrieved, and you can get the most out of big data and the internet of things (IoT).

About Equinix

Equinix, Inc. (Nasdaq: EQIX) connects the world's leading businesses to their customers, employees and partners inside the most-interconnected data centers. In 52 markets across five continents, Equinix is where companies come together to realize new opportunities and accelerate their business, IT and cloud strategies.

In a digital economy where enterprise business models are increasingly interdependent, interconnection is essential to success. Equinix operates the only global interconnection platform, sparking new opportunities that are only possible when companies come together.
