

Microsoft Azure

OVERVIEW:

Microsoft Azure is a Public cloud platform with numerous services including compute, storage, networking, analytics, and more. They are the second largest cloud provider by market share and are available in 24 regions, including North America, South America, Europe, Asia & Australia. Some of their offerings include IaaS, PaaS, DaaS, storage, Backup, DRaaS, Active Directory, and much more.

SERVICES SOLD:

Managed Azure
Azure ExpressRoute

HOW WE CAN HELP:

ITC can help customers prepare, enhance and manage their Azure environments with services such as assessments and consulting, migrations, security, hybrid solutions, and connectivity. Partners like Datapipe, Rackspace, HOSTING, and TierPoint offer managed solutions that reduce the complexity of Azure by providing planning, guidance, implementation and support. Working with our portfolio of network and colo providers, we can also offer private connectivity via Azure ExpressRoute. Check out some of AWS' main services and key features below.

Take a look at these questions below. These are some qualifying and technical questions about your business that will help us better understand how Azure can benefit your company.

- Is this a new or existing environment?
- Which services are you using?
- What is your average monthly spend?
- Do you have an Azure expert on staff?
- What are your security & compliance requirements?
- Do you have a migration plan?
- How do you connect to Azure?
- What are you doing for redundancy & high availability?
- Do you need to integrate with an on-prem IT environment?
- Do you have a hard time keeping up with changes, patches, and fixes?
- Would you benefit from outsourcing any of the following? Monitoring, maintenance, backup, DR, security, database, support and patching.
