RAGINGWIRE DATA CENTERS

ASHBURN, VA | SACRAMENTO, CA

Wholesale Flexibility Done Your Way

In the Heart of Northern Virginia's Data Center Alley

RagingWire bought 78 acres of land in the heart of Northern Virginia's "Data Center Alley." We intend to build a 1,500,000 square foot data center in phases on the site to meet the data center needs for our enterprise and internet-centric colocation customers.

VA2 Specifications:

- 78 acres of property
- 1,500,000 sq. ft. of data center space
- Connect to RagingWire's VA1 and area data centers via Colo Connect service
- Construction to start in 2014
- Whole unit or individual pods available for customized build-to-suit solutions

About RagingWire

RagingWire designs, builds, and operates mission-critical, high-availability data centers. With over 800,000 sq. ft. of critical data center infrastructure at its campuses in Northern California and Ashburn, Virginia, the company is recognized as an industry leader and innovator. Our patented power management systems and fault tolerant cooling plant lead the data center market in reliability. RagingWire is unique in the industry in that we deliver a 100% availability SLA even during maintenance windows. With highly customizable and flexible colocation solutions for both retail and wholesale buyers, a carrier neutral telecommunications philosophy, and unmatched reliability, RagingWire meets the needs of high power density, data intensive, and network-centric enterprises.

Largest Multi-Tenant Data Centers in California

Where's the best place for your data center in Northern California? Seismically stable Sacramento. We offer a wholesale product in our 150,000 sq. ft. data center (CA3) that delivers the best of both worlds – 2N+2 architecture and the flexibility to grow your IT environment with our patented infrastructure. You now have the opportunity to access California's largest multi-tenant data center campus – 650,000 sq. ft. - and reap all of the associated benefits!

CA1 & CA2 Specifications:

- 500,000 sq. ft. campus
- 80 MW backup generator power
- 37 MW critical IT load capacity
- 2N+2 electrical infrastructure
- Power densities available from 150 to 250+ watts / sq. ft.
- N+2 cooling plant
- 24x7 manned security
- LEED Certified & EPA ENERGY STAR rated

CA3 Specifications:

- 70,000 square feet available for customized build-to-suit solutions
- 14 MW of critical IT power
- 29 MW backup generator power
- Onsite dedicated 69kV substation
- Power densities available from 150 to 250+ watts / sq. ft.
- N+2 mechanical plant and 2N+2 electrical infrastructure with 100% availability
- 24x7 manned security with centralized electronic access control systems
- Tethered to RagingWire's CA1 and CA2 data centers

The World's Most Technologically Advanced Data Center in the Data Center Alley of Northern Virginia

Our Northern Virginia facility in Ashburn takes advantage of the latest in architectural design and optimizes every aspect of operating a data center facility. We are committed to helping you deploy a solution that ensures you are 'always on' through our patented electrical architecture and enterprise-class infrastructure.

VA1 Specifications:

- 5 pods totaling 150,000 sq. ft.
- Two 13,000 sq. ft. pods available for customized build-to-suit solutions
- 14.4 MW of critical IT power
- Power densities available from 150 to 250+ watts per square foot
- Access to over 200 telecom providers
- N+2 mechanical plant
- 2N+2 electrical infrastructure with 100% availability SLA
- 24x7 manned security with centralized, electronic access control systems
- Hardened building-within-a-building design
- Unlimited Remote Hands and Eyes
